

SUBJECT: Two new Google Ads landing pages to publish - In Smyle Dental (Lakeview & Roscoe Village)

Hi team,

Please publish the two landing pages attached. They are for our Google Ads campaigns only - one for the General Dentist ad group, one for Emergency Dentist. Everything you need is below.

1. PRACTICE DETAILS (already in both pages - please do not change)

Business name In Smyle Dental - Lakeview & Roscoe Village
Address 3514 N Lincoln Ave, Chicago, IL 60657
Phone on pages ... (773) 915-6530
Booking button ... https://book.allinone.dental/in-smyle-dental?referrer_id=6

Opening hours:

Monday	7:00 am - 7:00 pm
Tuesday	8:00 am - 6:00 pm
Wednesday	7:00 am - 6:00 pm
Thursday	7:00 am - 7:00 pm
Friday	Closed
Saturday	7:00 am - 3:00 pm
Sunday	Closed

2. PAGES, SLUGS AND META

PAGE 1 - GENERAL DENTIST

File: general-dentist-chicago.html
Slug: /lp/dentist-lakeview-chicago/

Meta title:

Dentist in Lakeview, Chicago - Same-Day, Evening & Saturday Visits

Meta description:

Need a dentist in Chicago? In Smyle Dental in Lakeview & Roscoe Village sees new patients the same day, opens evenings and Saturdays, and accepts most major insurance. Book online in under a minute.

PAGE 2 - EMERGENCY DENTIST

File: emergency-dentist-chicago.html
Slug: /lp/emergency-dentist-lakeview-chicago/

Meta title:

Emergency Dentist in Chicago - Seen Today, Walk-Ins Welcome

Meta description:

In dental pain right now? In Smyle Dental in Lakeview & Roscoe Village treats toothache, broken teeth and swelling the same day. Walk-ins welcome, evenings and Saturdays. Call (773) 915-6530.

The title and description tags are already written into each file, so you do not need to set them anywhere else. If the CMS has its own SEO fields, please make sure they do not override what is in the file.

THESE ARE NEW PAGES. They do not replace /lp/new-patient-dental-cleaning-exam/ or /lp/emergency-dentist-chicago/ - please leave both of those live and untouched. If you would prefer different slugs that is fine, just send them back to us so we can point the ads at the right URLs.

3. HOW TO PUBLISH THEM - IMPORTANT

Each file is a complete, standalone HTML document. It has its own DOCTYPE, head, stylesheet and scripts.

- Please serve each file AS-IS, at its own URL.
- Please do NOT paste the body into a page builder block, a Cornerstone element, or a theme template. The site's own stylesheet would then load on top of these pages and break the layout.
- If the platform needs a template, use a blank/canvas one with no header, footer or theme CSS.
- HTTPS is required. The review widget and the map will not load over HTTP.

4. THINGS THAT WILL SILENTLY BREAK THE PAGES IF CHANGED

- 1) Do not run a global find-and-replace on the phone number.
(773) 915-6530 is our CallTrackingMetrics number for Google Ads. If it gets swapped for the main practice number we lose all call attribution for these campaigns.
- 2) Do not strip or rewrite the "?referrer_id=6" on the booking links.
That parameter is the only way we identify Google Ads leads in the All-in-One CRM. Some plugins and link managers strip query strings - please check that nothing does.
- 3) The meta robots "noindex, follow" tag is intentional.
These are paid-traffic pages and must stay out of organic search. Please do not remove it, and do not add these URLs to the sitemap.
- 4) Do not minify or strip the JSON-LD script blocks.
There are two per page (business details and FAQ). Some optimisation plugins remove them.
- 5) The pages use inline <style> and inline <script>.
If the site sends a Content-Security-Policy header, it must allow 'unsafe-inline' for both on these URLs, or the pages will render unstyled.

6) The map is meant to load only when clicked.

You will see an address panel with a "Show map" button instead of an embedded map. That is deliberate - it keeps the page fast. It is not a bug.

5. LIVE GOOGLE REVIEWS - ONE THING WE NEED YOU TO CONFIRM

Both pages pull live Google reviews from our EmbedSocial account - a rating badge in the hero and a full reviews section further down. They use these two widgets:

Hero rating badge: `data-ref="8110babf905578547c0f838a3dbb2d6780619936"`
Reviews section: `data-ref="66074ade90598c60353246c46094eb88ed145ab4"`

These are the same widgets already running on
`/lp/new-patient-dental-cleaning-exam/`, so they do work on our domain.

PLEASE CONFIRM THE DOMAIN YOU PUBLISH TO IS AUTHORISED IN THE EMBEDSOCIAL ACCOUNT. EmbedSocial widgets only render on domains registered to the account and stay blank everywhere else. If you publish to a staging or preview domain first, the reviews will appear blank there - that is expected and not a fault in the page.

The page handles failure gracefully: if the widget cannot load, the hero badge shows a "Read our reviews on Google" link instead of an empty box, and the reviews section shows a link to our Google profile. So a blank widget is easy to miss - please check the reviews are actually rendering on the live URL before signing off.

embedsocial.com must not be blocked by any firewall, ad-blocker rule or CSP on the site.

6. DOMAINS THAT MUST NOT BE BLOCKED

<code>embedsocial.com</code>		Live Google reviews and rating badge
<code>d1liwgb7g2683x.cloudfront.net</code>	...	Our own images (award badge, insurance logos, dentist photos)
<code>fonts.googleapis.com</code>		Page fonts
<code>fonts.gstatic.com</code>		Page fonts
<code>book.allinone.dental</code>		Booking button
<code>www.google.com</code>		Map embed (loads only on click)
<code>maps.app.goo.gl</code>		Google reviews link

7. QUICK CHECK AFTER PUBLISHING

Please confirm on the live URLs:

[] Both pages load with full styling, no site header or footer wrapped around them

- [] The Google rating badge in the hero shows a real star rating and review count
- [] The reviews section further down shows actual review cards
- [] Every "Call" button dials (773) 915-6530
- [] Every "Book" button lands on the booking page with ?referrer_id=6 still in the URL
- [] The FAQ items open and close when clicked
- [] The "Show map" button loads the map
- [] No sideways scrolling on a phone
- [] View source shows "noindex, follow" still present
- [] CDN and page cache purged

Once they are live, please send us the two final URLs so we can point the ads at them.

Thanks,
Ritesh
